

**Celebrating 125 Years**  
of Engineering the Future

# Thursday

# May 27

THE INSTITUTE OF ELECTRICAL AND ELECTRONICS ENGINEERS, INC.  
**San Francisco Graduates Of the Last Decade:**

## Getting Ahead in Engineering

### **DATE & TIMES**

*Thursday, May 27, 2010*  
*12 p.m. – 1 p.m.*

### **PLACE**

*Pacific Gas & Electric Office*  
*245 Market St.*  
*Room # 1410*  
*San Francisco*

*Check in at the West Lobby to*  
*verify your name on the IEEE*  
*GOLD list*

### **INFORMATION**

*Closest BART/MUNI Station is*  
*Embarcadero*

### **RSVP REQUIRED**

*(Space is limited)*  
*Marvic Verzano*  
*510-874-2408*  
*MCV9@PGE.COM*

### **LUNCH**

*Free for IEEE members*  
*\$5 for non-members*  
*RSVP required*

In this economic climate it is hard to find a job – much less get a promotion. If you are a fresh graduate with little experience, it may be even worse. Should you plan your career to the business side of the company or stay on the technical side? What actions should I take to move ahead in the company?

If you are an undergraduate, what actions should you contemplate? What does it take to be the person a company wants? How do you stand out among the crowd and land the job?

Here is your chance to gain critical information and knowledge. A pair of Human Resources College relations staff and a Professional Recruiter will present how to get ahead in engineering and beyond. Here is your chance to hear what real college recruiters and professional recruiting people look for in individuals.

For Undergraduates and Fresh Grads:

- Tips on getting internships or full-time positions after graduation.
- Application process for college relation Programs post-graduation

For the Professional

- Positioning yourself to move up
- Managing change in your career
- Engineering leads in industry

### **Speakers:**

A panel of PG&E college relations staff and professional recruiters:  
Anndee Francisco - College Relations  
Nicole Mincin - College Relations  
Jose Mendoza - Professional Recruiting
