Subject: Arc Flash Management and Technology

Speakers: Ed Rossi, President; Ashok Kulkarni, Vice President Engineering; Predrag Milovac, Design Development Manager, Industrial Electric Mfg™ (IEM)

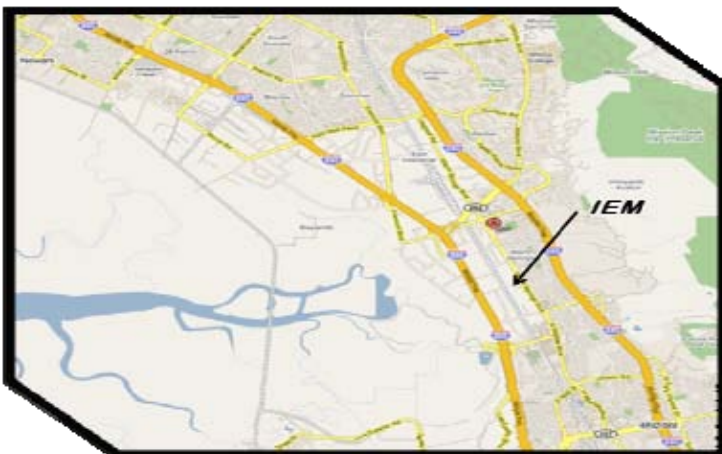

Measures to increase equipment and personnel safety in manufacturing are reflected in new approaches and technologies designed to help minimize the risk of workplace dangers in the event of an arc flash. With a multitude of potential dangers and new ones continuously emerging, companies must be diligent in their ongoing efforts while considering new approaches and technologies to improve plant safety. This presentation will focus on implementing techniques and practices designed to reduce hazards and minimizing risk for workers who must enter an area with an electrical arc-flash potential.

Ed Rossi is president and chief executive officer of IEM. Under his direction, IEM annual sales have grown over 400% since 2004 and the company has forged a solid reputation as a manufacturer of custom electrical distribution equipment.

Ashok Kulkarni is vice president of engineering at IEM, overseeing the development of new products and customer solutions, product testing, IEM processes, and agency certifications. Kulkarni was awarded a Ph.D in Electrical Engineering from Texas A&M.

Predrag Milovac is design development manager at IEM responsible for the research, development and execution of IEM's new arc resistant switchgear. Milovac earned a Master of Science from Purdue University.

Please join us for what is sure to be an interesting and productive session.

Date:	Tuesday May 25, 2010
Time:	5:30 pm (Buffet Style Dinner) 6:00 pm (Meeting) 7:00 pm (IEM Plant Tour)
Location:	Industrial Electric Mfg™ (IEM) 48205 Warm Springs Blvd. Fremont, CA 94539 510.656.1600
Cost:	Free - Compliments of IEM Limited Seating, please email RSVP to jima@iemfg.com To reserve your seat
Student Members:	Free - Compliments of IEM Limited Seating, please email RSVP to jima@iemfg.com To reserve your seat
Contact:	Jim Avery IEM jima@iemfg.com
