

## Oakland-East Bay / Computer Society

# MEETING ANNOUNCEMENT

See also the IEEE GRID at: <http://www.e-grid.net/>

You are invited to our next Chapter meeting for an Open Forum Discussion on:

### Cyber Security for Industrial Controls

Our discussion will initially focus on the recent reported activities of the STUXNET software worm which reportedly targeted centrifuges in Iran. A compilation of what has appeared in the open public press about what it is, how it may have been introduced, and what it did, will be presented. As time and group interests allows, the discussion will touch on other similar occurrences where operations were impacted by lack of cyber security measures.

We encourage open participation and debate so we can all benefit. Your knowledge of programmable logic controllers, process controls, and industrial computer networks, can help us all appreciate these attacks and better protect our systems.

Join us for an open discussion facilitated by Ron Kane of Lawrence Livermore National Laboratory and IEEE OEB member (An interested and equally uninformed party who finds this fascinating).

**Date: Tuesday April 5, 2011, 6-8PM**

**Location: Emil Villa's, 3064 Pacific Ave, Livermore, CA.**

**Agenda:**

6:00 – 6:30pm	Social Networking and Optional Food/Beverage ordering
6:30 – 7:45pm	Open Forum Discussion on Topic
7:45 – 8:00pm	Wrap-up and/or Chapter Business
8:00pm	Adjourn

**Contact:** Tim J. Voss, IEEE OEB Computer Society Chairman, LLNL, 925-423-9000

**Open to all interested East-Bay Techies, IEEE members or not, No RSVP Required**
